

From the North West, for the North West

# United Utilities' contribution to your Manchester Central Constituency

## We are Water for the North West

Whether delivering essential water and wastewater services, creating local jobs or helping safeguard the region's uniquely beautiful environment, we touch the lives of every person in constituency without them even knowing.

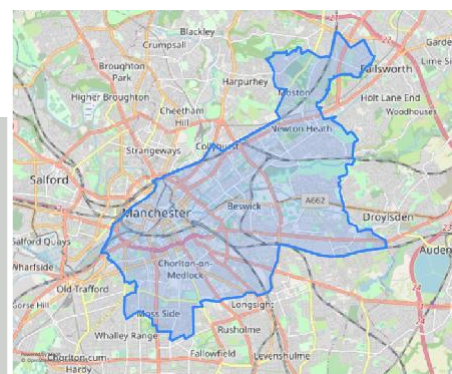

Every day, our teams are working hard to run, maintain and improve water and wastewater services in your area, including cutting leakage by 15% and improving the resilience of all our networks.

### Resilience: Haweswater Aqueduct

Our huge regional network is part Victorian engineering genius, part 21st century tech, and everything in between. Guaranteeing the resilient services a growing North West needs means anticipating future trends such as climate change. The next five years will see the start of an ambitious upgrade to one of our key assets - the 134km **Haweswater Aqueduct** - to safeguard supplies for parts of Cumbria, Manchester and the Pennines.

Our investment in running and improving our services in Manchester Central will contribute **£22m** to the economy in your constituency over the next five years.

Some **14 people** who live in Manchester Central work for us directly, many of them now recognised as key workers for the essential services they help deliver.

We support a total of **22,500 jobs** throughout the North West through many local companies in our supply chain, some here in Manchester Central.

We help people who need it in times of financial crisis, like during the recent COVID outbreak.

We helped **15,037 people** in Manchester access **£5.89m** in financial support in the past 12 months through our assistance schemes.

# Across the North West, all day, every day

We employ around  
**5,000 staff**  
and support another  
**17,500 jobs**  
in our supply chain.

Many pensioners across  
the North West and  
beyond rely on the stable  
returns we deliver.

We support more than  
**100,000 customers**  
through a portfolio of  
schemes aimed at tackling  
affordability and vulnerability.

**As the only locally-based FTSE100 company in the North West, we do our utmost to help level up the region to its rightful place as one of the best places to live, visit and invest in the UK.**

In the next five years, we'll invest £5.9bn running, upgrading and future-proofing the region's water infrastructure and services to a blueprint shaped by our customers.

We'll help lift a quarter of a million people out of water poverty, cut leakage and knock a tenth off water bills so that by 2025 average bills will be less, in real terms, than 2010.

And we'll adapt as we go. As COVID-19 shows, customer priorities change, which is why we constantly seek their views through Water Talk, our 7,700-strong customer panel.

## Get in touch

As an MP, your unique insight into local and national issues is hugely valuable and we'd like a working relationship that's as useful to you as it is to us.

Hopefully, this snapshot of how we shape up in your constituency is a good start. We look forward to working with you and your team.
