

From the North West, for the North West

United Utilities' contribution to your Tatton Constituency

Between 2020 and 2025 we will spend £30m improving services in Tatton

We are Water for the North West

Whether delivering essential water and wastewater services, creating local jobs or helping safeguard the region's uniquely beautiful environment, we touch the lives of every person in Tatton every day without them even knowing.

We'll be spending £30m right here over the next five years running, maintaining and upgrading water and wastewater services locally, including cutting leakage by 15% and improving the resilience of all our networks.

In Tatton, this includes projects to improve water quality at Alderley Edge, Great Warford, High Legh, Knutsford, Mobberly and Wilmslow wastewater treatment works.

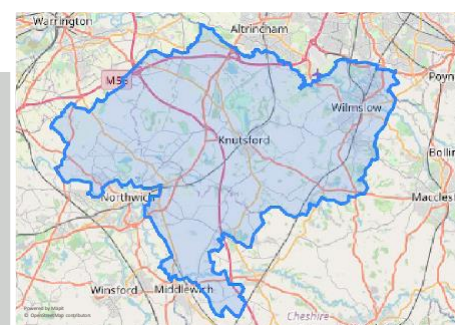

Innovation:

Innovation lab

Our innovation culture is pioneering new technology to drive the efficiency and performance needed to help keep bills low and improve customer service. Our **Innovation Lab** works with global developers and inventive local startups to bring new tech to market. As a result, we are using large-scale artificial intelligence in operational systems to improve services to customers.

Our investment in running and improving our services in Tatton will contribute £14m to the economy in your constituency over the next five years.

Some **47 people** who live in Tatton work for us directly, many of them now recognised as key workers for the essential services they help deliver.

We support a total of **22,500 jobs** throughout the North West through many local companies in our supply chain, some here in Tatton.

We help people who need it in times of financial crisis, like during the recent COVID outbreak.

We helped **3707 people** in Cheshire East access **£1.51m** in financial support in the past 12 months through our assistance schemes.

Across the North West, all day, every day

We safeguard

1,300km of coastline

7,000km of rivers

We contribute around

£240 million

a year to public finances.

Many pensioners across
the North West and
beyond rely on the stable
returns we deliver.

As the only locally-based FTSE100 company in the North West, we do our utmost to help level up the region to its rightful place as one of the best places to live, visit and invest in the UK.

In the next five years, we'll invest £5.9bn running, upgrading and future-proofing the region's water infrastructure and services to a blueprint shaped by our customers.

We'll help lift a quarter of a million people out of water poverty, cut leakage and knock a tenth off water bills so that by 2025 average bills will be less, in real terms, than 2010.

And we'll adapt as we go. As COVID-19 shows, customer priorities change, which is why we constantly seek their views through Water Talk, our 7,700-strong customer panel.

Get in touch

As an MP, your unique insight into local and national issues is hugely valuable and we'd like a working relationship that's as useful to you as it is to us.

Hopefully, this snapshot of how we shape up in your constituency is a good start. We look forward to working with you and your team.
